

SYRINGOMYELIA in the Brussels Griffon

CHF GRANT # 1004

The ABGA is continuing to support the Canine Health Foundation and Dr. Simon Platt's research on Syringomyelia in the Brussels Griffon. In addition to the funds that have already been accumulated, the ABGA has recently donated an additional \$2000.00, and the ABGA Health Fund has donated \$500.00 ... for a total of \$2,500.00.

Please remember that we still need to generate additional income to fulfill our commitment to the Canine Health Foundation. If every member of the ABGA and the NBGC would donate just \$1.00 ... we could generate an additional \$500.00. If every member donated just \$5.00, we could generate \$2,500.00.

And if we all dipped deep and found \$10.00 each we could generate **\$5000.00 !!!!!!!**

If you know of a friend that has a Griffon, and they are not a member ... please encourage them to make a donation as well. Every dollar counts!

The current economic times have been difficult for all of us, but things seem to be improving. Please take the time to make any donation that you can to this important research ... It is for the Future Health of the Brussels Griffon !!!!!

Please **MAKE** your checks payable to: Canine Health Foundation – Grant #1004

Please **SEND** your checks to:
